LEARNING METHODOLOGY

► PHASE 1 - COURSE INDUCTION

Induction is designed to familiarise with the various resources & systems that will be made available for the studies including syllabus structure, possible progression routes, assessment framework, feedback methods and our teaching methodologies.

► PHASE 2 - COACHING

This phase enables to gain knowledge and introduces key exam skills to students through face to face lecturing hours. Comprehensive set of course based learning materials will be provided prior to this phase. We have invested in ensuring the delivery of more vital lecture time as we believe that the number of classroom hours has a direct impact on exam performance.

► PHASE 3 - REVISION

From the knowledge level onwards there is a revision phase for each paper. The revision phase doesn't just recap the syllabus, it also includes exam standard question practice with constructive feedback and a mock exam to help you get ready for the exams.

► PHASE 4 - EXAM PRACTICE

We believe that one of the keys to exam success is continual assessment - both in the form of self assessment by you and more formal assessment by qualified markers. During the Question Practice phase, you will be able to try practice questions under your own conditions, which are then marked with personalised feedback on your answers.

► PHASE 5 - ONLINE RESOURCES

we provide our courses in both ios/android platforms and website (www.myeducateme.com)
